

Thorp Institute of Integrated Medicine microcurrent therapy helps to relieve the pain and neuromuscular symptoms associated with the following conditions:

Arthritis—Osteo and Rheumatoid, Auto accidents/trauma, Back injury, Broken bones, Bursitis, Detoxification, Disc injuries, Fibromyalgia, Headaches, Multiple Sclerosis, Nerve entrapment, Pain (acute and chronic), Plantar Fasciitis, Post-operative pain and tightness, Scar tissue repair, Sciatica, Spinal injuries, Sports injuries, Tendonitis, TMJ, Wound healing

"The Acuscope and Myopulse modalities can help with detoxification, energy production, and ATP fortification in cells. They offer an alternative healing methodology that really works."

Dr. Stephen Sinatra, M.D.
Board Certified Cardiologist,
Nutritionist, and Author of
"The Sinatra Solution"

Microcurrent Pain and Detoxification Therapy for People:

- Who have not had success with other treatments/modalities
- Seeking to take less prescription pain medication
- Who would like to recover faster from surgery, injuries, or trauma
- Seeking detoxification at the cellular level

If you have experienced any of the conditions in this brochure and are seeking a modality that really works, contact us: 858-539-6111

To find a referral physician or a practitioner in your area who uses the Thorp Institute of Integrated Medicine modalities:

Thorp Institute Advanced Electrotherapy

Sports Rehabilitation & Pain Management Systems

Treatment, Training and Equipment

Relieves Swelling, Inflammation and Pain &
Increases Range of Motion Quickly

Who We Are

John Thorp
President &
Founder of
Thorp Institute

Lisa Thorp
Vice President,
Director of Public
Relations

The Thorp Institute of Integrated Medicine, Inc. is recognized as one of America's foremost authorities on the effective use of microcurrent therapy for pain management and sports injury rehabilitation.

John Thorp discovered this revolutionary technology over twenty years ago when he shattered his leg. Declining surgery, Thorp elected to receive Acuscope and Myopulse microcurrent therapy—which healed his leg and enabled him to complete a triathlon a year later. Today he remains pain free.

In the over twenty-five years that Thorp has used microcurrent instruments he has overseen the successful treatments of over 10,000 patients, at several major hospitals and private clinics. Thorp's extensive experience enabled him to develop clinically proven and copyrighted protocols while training others to obtain the same extraordinary results he has had.

How The Therapy Works

Energy and the Body

Energy flows constantly between all cells in the human body. When minute amounts of electrical energy are delivered to the cell, ATP production increases and the healing process is accelerated.

Advanced Technology

The Thorp Institute microcurrent equipment (the Electro-Acuscope and Myopulse) is the most advanced FDA-registered instruments in their class. The unique feature of this equipment is its ability to detect and correct subtle electrical blockages and imbalances in areas of the body through the use of missile guidance based microchip technology.

What to Expect

During each 60-90 minute treatment, two or four probes or plates are placed with botanical based conductive gel onto the body, and then the microcurrent therapy is comfortably introduced to the affected areas. Depending on the severity of the condition or degeneration, it may take more treatments to see results (3-12 are standard). Patients can expect increased range of motion, improved neuromuscular function and a sense of wellbeing after the first treatment, reduction or elimination of pain within three sessions and a feeling of regeneration in twelve. Treatments range from \$80-\$150 per session.

Patients' Feedback

"The doctors told me I needed a hip replacement. I saw John Thorp 10 years ago and he regenerated my hip instantaneously. I have been ambulatory ever since. Now I swim, snow ski, scuba dive, bike and run. I think that it is important that you know about his Thorp Certified Electro-Acuscope and Myopulse Programs."

Mark Victor Hansen
Co-Author
Chicken Soup for the Soul,
series of books

"I met John 14 years ago. I had surgery in November 2009 and didn't have time for normal six-month recovery. I called John. He treated me for three days. I didn't think it would happen quite this quickly but I was throwing a baseball within three weeks and throwing without pain after the treatment. A lot of people might be skeptical. For me, every time I get on the equipment I notice a difference. It's hard to discount the fact the Acuscope works. Certainly I've benefited from getting someone who knows how to use the equipment and knows the Thorp Protocols."
